

Less waste, more for our future

Responsible
towards nature.
Responsible
for our future.

Every small change we make contributes to a cleaner environment.

Small steps make a big difference.

10 TIPS FOR LESS WASTE

1 Rethink before you buy.

Buy only what
you really need and
choose quality products
that last.

2 Choose reusables.

Use a reusable water
bottle, mug, container
and shopping bag.

3 Avoid excess packaging.

Choose products with
less packaging or
packaging-free.
Support local
producers.

4 Plan your meals, reduce food waste.

Buy only what you need
and use your leftovers
wisely.

5 Repair, reuse, extend.

Fix it, or give it
to someone who can
use it again.

6 Swap, donate, buy second-hand.

Clothes, books, toys –
many things can
get a second life.

7 Use both sides and go digital.

Print only when necessary
and use previously
used paper.

8 Compost.

Compost food waste
at home or dispose of it
properly in the
brown bin.

9 Separate your waste correctly.

Sorting waste properly
helps it get recycled
and reused.

10 Be a role model.

Small actions can
inspire those
around you.

WHY IS IT IMPORTANT?

Less waste means less pollution, lower
use of natural resources and lower costs
for all of us. Together, we create a greener
and more pleasant environment for
future generations.

DID YOU KNOW?

As much as 40 % of waste is generated
in our homes.
Through responsible actions,
we can significantly reduce this amount.

WHERE DOES IT GO?

ORGANIC WASTE

In the brown bin
or compost.

PACKAGING

In the yellow bin:
plastic, metal,
tetra pak, styrofoam.

PAPER

In the blue bin:
paper, cardboard,
paperboard.

GLASS

In the green bin:
glass packaging
without lids.

RESIDUAL WASTE

In the black bin:
what cannot
be recycled.

COLLECTION CENTER CERKLJE

Hazardous waste,
bulky waste, electronic
equipment and more.

ZAVOD ZA TURIZEM CERKLJE

Together for a clean,
green and sustainable future.
